INTRODUCTION

Why this Comparison

Have you ever wanted to read the scriptures in their earliest form, before they were edited to satisfy the agendas of various kings or church leaders, but like myself never learned to read Greek or Hebrew? Have you ever had a twinge of doubt as to how faithfully our current English translations represent the original Greek? These were some of the doubts that drove my determination to satisfy my curiosity about the original scriptures. Not being able to read Greek or Hebrew, I had to rely on those who had done the original translations into English.

During my initial research I found a lot of opinions and arguments, but hardly any facts. I found it nearly impossible to find easily readable versions of the earliest Bibles in English. As I continued my search, I was gradually led to first one source, and then to others that have only very recently been completed, of the updating of these difficult to read earliest bibles in English to current spelling standards. These works are faithful to the original translations, only the spelling is updated. The individuals who devoted so much time and effort to updating the spelling in these earliest Bibles took great pains not to alter the text in any way, merely to provide us with an easier to read copy of these classic and mostly forgotten Bibles in modern spelling.

The history of how the Word of God came to be printed in the English language is long and fascinating. There are many web sites devoted to this subject that can be found using any of the various search engines, and many printed books as well. I will not attempt to duplicate here what has been done so well by so many others. I will provide only a brief introduction to each of the Bibles presented here, and leave further study to the interested reader.

After I came to the Lord and first started studying the Bible seriously I was confronted, as all are, with a bewildering array of versions, from the classic King James to the International Bibles, the various paraphrased Bibles, and all of the various “New” versions. Wanting to study the most accurate version, I turned to the internet to do a little research on which of all of these versions was the most accurate. There I found a variety of sources for comparing various Bible versions, and a lot of web sites promoting King James Only, some of them down right hateful in their disdain for any other version, and particularly for the New King James, which I personally liked. This disturbed me greatly so I kept researching and found a lot of information that was new to me about the history of how the Bible came to be printed in English, and how it evolved over the years into the variety of Bible versions we have today.

I discovered that there were many versions of the Bible that pre-dated the King James and were used by the committee that developed the King James, but I found no resources for comparing these earlier versions to the King James and later versions. These earlier versions were done by individuals or groups under great hardship and at great risk to themselves, indeed many were executed for their efforts. These were extremely dedicated and well educated individuals. Knowing that the King James was first published in 1611 under the orders of James I, and shortly after the reign of Mary I (Bloody Mary) whose persecution cost so many Protestants their lives, I wanted to see to what degree these earlier versions agreed or disagreed with the de-facto standard, the King James. I just could not shake the feeling that to displease the King was very dangerous and that the closer to the original source one could come, the more likely one was to have the un-altered truth.

I found that copies of these earlier Bibles in print were extremely costly, available only from rare book dealers, and it was very difficult to locate copies on the internet. The few internet sources I did find, to my disappointment, were in their original Middle English, barely recognizable as the English we know today. That was both good and bad, at least they were authentic, even if nearly unreadable. Undaunted, keeping the faith that if I was following the right course the resources would be made available to me, I kept looking. One by one, I was led to the web sites of individuals who had invested enormous effort and time to update the wayward spelling and casual use of proper names of Middle English into modern English spelling, with no other alteration to the original text. In reading these early versions side-by-side with more modern versions, I found the early versions often much more readable and easier to understand.

Scholars and seminary students, particularly those who have learned to read Hebrew and Greek, have many resources available to study early scripture. Much of this is very academic in nature, not easy to read, and is unavailable or unreadable to the rest of us who can not read those older languages. Presented here, for the first time, to the best of my knowledge, are the most important of the pre-King James Bible translations along side each other in modern spelling with the King James for easy comparison. I began this study as a skeptic, expecting to discover significant differences between these early translations and the King James. I happily found that there are no differences in the major points of faith, but there are many subtle differences in meaning and many passages are much easier to understand in one version than in another. I found no one version that seemed to be the best in every instance, each one has its strengths and weaknesses. I leave it to you, the reader, to decide which version is the clearest and most meaningful to you for any given passage. One argument this study does conclusively put to bed is the claim that any one translation is the best for all occasions and all readers, to the exclusion of all others. I have resisted the temptation here to highlight or otherwise comment on what I believe to be significant differences between various versions. I feel that anyone with enough interest to purchase and read a book of this type is well able to make those judgments for themselves.

All of these early bible translations used paragraph breaks to indicate breaks in the thought patterns, even after the introduction of short numbered verses. This convention has been dropped in most of the present translations, and much has been obscured in so doing. Many people take the short individual verses and read them out of context, thereby missing the point entirely. I urge you to pay attention to the paragraph breaks in these texts and to read and study complete thoughts instead of just memorizing individual verses.

It is my sincere hope that this comparison of early bible versions will prove to be as fascinating and instructive for you as it has been for me, and will spark a revival of interest in these classic Bibles, for which so many suffered so much. If this work is well received and if I am granted the years of good health, I hope to be able to complete this same study of the books of the Old Testament in the future. May God bless you and lead you in your quest for the full and true meaning of his word.

Short Chronology

Following is a very brief chronology of the most significant milestones in the evolution of the Bible into English. It is not intended to be thorough or exhaustive, only to give the reader some introduction to the subject and hopefully spark interest in further study.

- 100 The first century saw the completion of all the gospels and epistles that now make up the New Testament in their original Greek.
- 390 Jerome's Latin Vulgate manuscripts are produced at the direction of Roman Emperor Constantine I, containing 80 Books (39 Old Testament, 14 Apocrypha, 27 New Testament).
- 1384 John Wycliffe produces the first hand written manuscript copy of the complete Bible in English (80 Books) from the Latin translations then in use.
- 1395 John Purvey revises the Wycliffe Bible.
- 1455 Gutenberg invents the printing press and prints the first book ever printed, the Gutenberg Bible in Latin.
- 1516 Erasmus prints the first consolidated New Testament in Greek from original manuscripts
- 1522 Martin Luther prints the first New Testament in German translated directly from Erasmus' Greek.
- 1526 William Tyndale prints the first New Testament in English translated directly from Erasmus' Greek.
- 1530 Tyndale prints the first Pentateuch (the first five books of the Old Testament, the Jewish Torah or Law) in English.
- 1534 Tyndale prints his revised New Testament.
- 1535 Miles Coverdale prints the first complete Bible in English translated directly from Greek (80 Books).
- 1537 Matthews Bible, the second complete Bible to be printed in English, John "Thomas Matthew" Rogers (80 Books).
- 1539 The "Great Bible", the first English Bible to be authorized for public use is printed (80 Books).
- 1560 The Geneva Bible, the first English Bible to add numbered verses within each chapter is printed, containing extensive references and commentaries (80 Books).
- 1568 The Bishops Bible, the Bible which King James ordered to be the basis for the King James Bible was printed (80 Books).
- 1611 The original King James Bible is printed (80 Books).
- 1769 The Baskerville-Birmingham revision to the original King James Bible is printed, with spelling updates and minor word changes (80 books).
- 1885 The English Revision Committee revised the King James Bible, removing the Apocrypha and leaving the current 66 books. This is known as the English Revised Version today.

Conventions used

The following conventions were used in compiling this comparison:

Proper names in most cases were normalized to the spelling used in the King James Bible.

Neither the Wycliffe Bibles nor the Tyndale Bibles contained verse numbers. In order to facilitate this comparison, verse numberings were added to match, as closely as possible, the later King James Version. The only exceptions were where the translators' paragraphs breaks necessitated moving part of a verse to the adjoining King James verse.

In the Tyndale Bibles [Square brackets] represent text that was present in the 1526 variant but not in the 1534. Likewise underlines represent text that was unique to the 1534 version.

The King James version contained only a few explanatory marginal notes. I chose to include these notes in-line with the scripture and enclosed them in {braces}.

Italics were used by many of the respective original translators to indicate words or expressions in the original Greek that require additional words in English for clarification. The *italics* are included here as in the respective translations.

Paragraph marks (§) were used by the translators to indicate where the text was to be separated into paragraphs. Many of our modern bibles have dropped this convention, and a lot of meaning is thereby obscured. I have left § marks in place, just as the original translators had them.

There was no consistency of naming the various books of the New Testament in the earliest translations. The earliest Wycliffe named the Gospels simply "Matthew", "Mark", "Luke" and "John". The later Tyndale embellished this to "The Gospel of S. Matthew", etc. The later Geneva further embellished this to "The Holy Gospel of Jesus Christ according to Matthew". The later King James combined the Tyndale and Geneva, using "The Gospel according S. Matthew", etc. This presented me with somewhat of a problem with naming the various books, as there was no consistent tradition to follow. I chose to follow the Geneva naming convention fairly closely, but refer to Jesus as Christ Jesus in order to emphasize the fact that this was far more than simply a first and last name, it was his divine title. I also took the liberty of adding explanatory titles to the names of the authors, according to the most reliable current scholarship, since this comparison is intended to be at least somewhat instructive.

Throughout this comparison, I refer to dates as C. E. rather than the more common A. D. This is not an attempt to remove the religious connotation from this work, but is intended to emphasize the error in the common conception of A. D. as meaning "After the Death" rather than the correct meaning as an abbreviation of the Latin phrase "Anno Domini". I chose to use C. E. as meaning "Christian Era" starting at the birth of Jesus.

Early Anglo-Saxon Translations

Between 651 and 1382 various portions of the bible were translated from Latin into the Anglo-Saxon and Teutonic tongue by devoted priests. These languages were the early roots of the English language, but are barely recognizable as English today.

Middle English

A few brief words are in order here regarding the Middle English in which all of these early English Bibles were written. English during the times these first Bibles were being produced

was a language in transition, struggling to define itself as a unique language all its own. The structure of the language was considerably different from today, and there were no spelling, punctuation or grammar standards that we now take for granted. It is not at all uncommon to find the same word spelled several different ways on the same page. There are also many instances where 2, 3, or more words are run together and appear as one, and instances where words that are now one are separated in unfamiliar places. This does not imply that these early Bible translators were uneducated men. Quite the contrary, they were some of the best educated men of their times, and dedicated to their tasks of providing the Bible in the English language to the point of willingly risking their earthly lives for the sake of bringing the Word of God to the masses.

Proper names were in the same disorganized state as the rest of the spelling. There was a great deal of casualness about the use of proper names during this time. The people who worked so hard to bring these Middle English texts up-to-date have standardized the proper names in most cases to the names as used in the familiar King James Version.

As if all this were not enough, there were many words that are no longer familiar, many words that have evolved into other words, and in some instances words that have changed meaning. All of the various people who worked so hard to bring these Middle English texts up-to-date had to contend with all of these difficulties, and it was no small task. We all owe them all a debt of gratitude for their hard work.

the Wycliffe Bible

John Wycliffe, 1328 - 1384, was the first person to translate the bible into the English language, along with his close friend and associate John Purvey.

In the first century, long before the bible was compiled into its current form, the individual letters (epistles) and gospels were written in Greek, the common language of the common people at that time. A thousand years later, the bible was available only in Latin, a language not understood by the common person, and not even understood by most of the priests who recited assigned portions from memory at church services. Latin was understood by only a very few of the most highly educated scholars and clergy.

John Wycliffe, a professor at Oxford University in England, was a strong believer that the Word of God belonged to the people, not to the Church, and so he and his close associates, most notably John Purvey, set about to produce a copy of the Bible in the English language. This Bible was hand printed (the printing press would not be invented until 1455) and first appeared around 1382. This bible is referred to as the Early Wycliffe Bible. He was thanked for his monumental effort by being fired from his privileged position at Oxford, and died 2 years later a broken man.

Unfortunately, Wycliffe had no access to any of the original Greek or Hebrew manuscripts for his work in translating the Bible. This first translation of the Bible into the developing English language was made from the Latin Vulgate of Jerome, first produced around CE 390, that was in use at that time by the Catholic Church. Each chapter of the Wycliffe Bible was written as one unbroken block of text. There were no verse numbers and no paragraph breaks, these would be later refinements. This bible contained the now familiar 39 Old Testament and 27 New Testament books plus the 14 apocryphal books contained in Jerome's Latin bible, now

recognized as non-scriptural books, for a total of 80 books. It is often said of Wycliffe's work that he laid the egg for the Reformation, and Luther hatched it.

The scripture for this comparison was reprinted with permission from the Modernized Wycliffe Bible by Terence P. Noble. Mr. Noble expended an enormous amount of effort to bring the spelling of the very difficult to read middle English of Wycliffe up to current spelling standards. His work also presents, side-by-side, both this and the later Wycliffe Bible discussed below, both in easy to read modern spelling. In order to facilitate his comparison with the King James Bible, Mr. Noble did break the original text of the Wycliffe Bibles into numbered verses matching the later King James. In the very few instances where the chapter break points in the King James were different than the Wycliffe, Mr. Noble chose to follow the King James convention.

For this comparison, chapter break points were faithfully reproduced from the original Wycliffe text, using the book titled "The New Testament In English according to the version by John Wycliffe about A. D. 1380 and revised by John Purvey about A. D. 1388" reprinted by the Clarendon Press at Oxford in 1879, a digital facsimile of which is available from Mark Langley at mlangley1@cox.net. This moving of some chapter break points is the only change made to Mr. Noble's excellent work.

For a much more thorough treatment of the history of the Wycliffe Bible, you may contact Terence Noble at either terry@smartt.com or terry@canadawired.com, from whose excellent work the scripture for this comparison was reprinted by permission.

For those who wish to gain an appreciation for the enormous efforts of Mr. Noble, a version of the Wycliffe Bible in its original form is also available on the web at http://wesley.nnu.edu/biblical_studies/wycliffe/index.htm.

the Purvey/Wycliffe Bible

John Purvey, 1354 - 1421, was an associate and close friend of John Wycliffe and worked with Wycliffe in translating the Early Wycliffe Bible discussed above. Following Wycliffe's death in 1384 Purvey revised their earlier Bible using a more readable prose style. This revision was first completed around 1395, although portions were circulated much earlier. This is referred to as the Later Wycliffe Bible and found much wider acceptance, as it was less literal and more readable. These were still hand written copies and contained all 80 books.

These two earliest bibles in the English language are of extreme importance to Catholics and Protestants alike. For both, they represent the very first effort to provide the scriptures in the developing English language. For Catholics, they represent also the scriptures in the English language that evolved, around 1582, into the Rheims New Testament that was later integrated into the first Douay-Rheims Bible. This bible was also based on the Latin of Jerome.

For his efforts Purvey was imprisoned until he recanted his "sin" of making the Bible accessible to the masses in English. Upon his release he was watched and hounded at every step by church authorities until he eventually disappeared into obscurity and died an unknown man. Fortunately for us, his work lived on.

Masterful works, long since forgotten and disappeared into obscurity, these were the only Bibles available in the English language for over 130 years.

Purvey's work is expertly presented, with spelling updated to current standards, by Terry Noble in his Modernized Wycliffe Bible discussed above.

A version of this Bible in its original form is available on the web, under the name Wycliffe, at <http://www.studylight.org>.

Erasmus' Greek New Testament

Desiderius Erasmus, 1469-1536, attended Oxford and Cambridge shortly before Tyndale. He was a highly respected Christian and humanist scholar all over Europe. He worked for approximately 15 years copying, sorting and classifying the fragmentary original Greek manuscripts into the first complete New Testament compiled directly from original Greek manuscripts since Eusebius' work in the fourth century. He was determined to produce a New Testament that was as accurate as possible. His New Testament in Greek, with a parallel column in Latin was first published in 1516.

A discussion of the selection, collection, sorting, classification and accuracy of the various fragments of the original Greek New Testament is far beyond the scope of this modest introduction. This brief discussion of Erasmus' Greek New Testament is included here only because it formed the basis of both Martin Luther's German translation and Tyndale's English translation of the New Testament and opened the door for the Protestant Reformation.

the Tyndale New Testaments

William Tyndale, 1494-1536, was an ordained priest and highly educated scholar who had studied at both Oxford and Cambridge and was the first person to translate the New Testament into English directly from the original Greek. Working primarily from Erasmus' newly produced Greek New Testament, and also from Martin Luther's 1517 German translation, the Latin Vulgate, the original Greek manuscripts, and whatever other sources he felt necessary, Tyndale printed the first New Testament ever translated into English directly from the original Greek. Except for Luther's 1517 German translation this was the first translation into any language directly from the Greek since Jerome's questionable Latin translation in C.E. 390. Tyndale's passion about the English language and the languages of the Bible are best summarized by this quote from the preface to his "Obedience of a Christian Man":

They will say it [the Bible] cannot be translated into our tongue, it is so rude. It is not so rude as they are false liars. For the Greek tongue agreeth more with the English than the Latin. And the properties of the Hebrew tongue agreeth a thousand times more with the English than with the Latin.

Tyndale was a master linguist, reading and speaking 8 languages fluently, including Hebrew, Greek, Latin, German and of course English. He was one of the most important craftsmen of the English language as we know it today. He originated many of the words and phrases we know today, such as "scapegoat", "Passover", "Jehovah", "shewbread" and "peacemaker". Tyndale was a friend and associate of Martin Luther, who was doing the same translation during this time into the German language, and crafting a unified German language. These two men were leaders of the Reformation movement, which evolved into the various Protestant denominations we have today.

Tyndale published his first translation of the New Testament in 1526. He continued to refine his New Testament translation, and began working on his fresh translation of the Old Testament from Hebrew. He printed his translation of the Pentateuch, the first 5 books of the Old Testament (the Jewish Torah or Law), in 1530 and did another complete translation of the New Testament which was printed in 1534. Tyndale placed the text for the books of the New Testament in paragraphs. This is much more pleasant reading than the modern style of individual verses. He also placed reference letters in the margins with minimal cross references for the first time, and added some explanatory marginal notes. The final additions provided by Tyndale were to include an explanatory prologue to the Gospels and to each epistle. Tyndale wrote in a simple, direct style intended for the common person, to be read and studied alone or in small study groups.

Tyndale was thanked for all of his efforts by being thrown into prison and eventually strangled and burned at the stake, before he was able to complete translating all of the books of the Old Testament. What a disappointing loss.

The one valid criticism of Tyndale's work is his placing of the word "Easter" into the mouth of Jesus in the gospels, which is of course absurd. Why he chose this word as opposed to "Passover" or "Pasch" I cannot say, but this in no way detracts from his other outstanding work.

Being unable to locate a copy of these works in modern spelling that was suitable for this comparison, I created my own modernized spelling version by updating Tyndale's Middle English spelling and combining the 1526 and the 1534 versions using the book titled "The New Testament Diligently Corrected and Compared with the Greek by William Tyndale: and finished in the year of our Lord God, 1534, in the month of November" which was imprinted at Antwerp by Marten Emperowr in 1534, a digital facsimile of which is available from Mark Langley at mlangley1@cox.net. This book presents the 1534 translation of Tyndale with the 1526 variants as footnotes.

I wanted this comparison to be as complete as possible so I inserted the 1526 variants in-line with the 1534 text and enclosed them in [brackets]. The unique 1534 text is indicated by underline. Although Tyndale did break chapters into paragraphs, there were no verse numbers. For convenience in doing this comparison, I did add verse numbers to match the King James. Tyndale's paragraph break points are indicated in this comparison by the paragraph (§) mark. Break points for chapters within each book are left just as Tyndale had them. I left all of the original wording, with one exception, and only updated the spelling. I did change the words wist/wot, which were the present and past tense of 'to know or become aware of', but are archaic and unfamiliar to most to know or known. Americanized English spelling was used in preference to the British spelling where differences exist.

For a much more thorough treatment of the history of the Tyndale New Testament, as well as a very interesting dissertation on the development of the Bible in English, see the introduction to Tyndale's New Testament, written by Dr. David Daniell and published by Yale University Press or visit a very informative Tyndale web site at <http://www.williamtyndale.com/0welcomewilliamtyndale.htm>.

the Geneva Bible

Geneva Switzerland in the later half of the 16th century was a center for textual scholarship and research in Europe, both scriptural and secular, and had become the home of many Protestant reformers escaping the persecution of Queen Mary I (Bloody Mary) of England and from elsewhere throughout Europe.

The English exiles began working on a new translation of the Bible, one for the average person to read and study in detail, a true study bible. This Geneva Bible contained lengthy explanatory prologues to all of the books, as well as extensive explanatory notes to individual verses throughout and extensive cross references. This was the first Bible in English that could truly be called a Protestant Bible. The New Testament was first printed in 1557, the entire Bible in 1560. This was a true international Bible, simple in phrasing, and went through over one hundred and fifty (150) editions, the last and most advanced being in 1599. The Geneva Bible was so loved that it remained the Bible of choice in England for over half a century after the printing of the King James Bible, until it was eventually banned by King James, who wished to promote the King James Version and to suppress the extensive explanatory notes. The Geneva was the Bible that the Pilgrims brought with them to the Colonies in 1620. This was the first English Bible to break the paragraphs into numbered verses to facilitate cross referencing, but they did leave in the earlier paragraph (§) markings for reference.

This was also an 80 book bible, as were all of the bibles at this time. Even though these were large and expensive bibles, the Pilgrims generally tore out and burned the 14 apocryphal books, which they felt were not divinely inspired scripture, but only books of Jewish history.

The list of firsts for the Geneva Bible is truly impressive.

This was the first Bible to break the paragraphs into the numbered verses we have today.

This was the first study bible with extensive cross references to the verse numbers.

This was the first true study bible, with extensive explanatory notes.

This was the first study bible with extensive explanatory prologues to each book.

This was the first committee written bible.

This was the first truly international bible, having been written by a committee from several countries and in as easy to understand English as possible.

The 1599 version of the Geneva Bible is expertly brought up to date, complete with all of the extensive explanatory footnotes and cross references, and with spelling corrected to modern standards and proper names normalized to the King James Version by Steve Zychal at www.GenevaBible.org. Steve's website also presents a much more detailed history of the Geneva Bible.

the King James Version

In 1603 Prince James VI of Scotland succeeded Queen Elizabeth I as King of England and was crowned King James I. This was a time of religious turmoil in England as well as the rest of Europe. One of the things that King James I disliked about the Geneva Bible were the extensive notes, some of which challenged the authority of both the Catholic Church and the Church of England.

In January of 1604 King James assembled a group of religious leaders to discuss resolution of sharp religious conflicts within England. This meeting eventually led to the establishment of panels of 54 of the best Hebrew, Greek, and religious scholars of the day at Oxford, Cambridge and London that produced the most widely printed Bible in history, the well known King James Version. King James ordered that this not be a new translation, but a revision of the heavily Latinized Bishops Bible of 1568 and have almost no explanatory notes. Evidence of this Latinized origin can be seen throughout the King James, in the tone and sentence structure. Although obligated to follow the King's orders, the committee also drew very heavily from Tyndale, Geneva, and even the Catholic Douay-Rheims. This is clearly evident in comparing many of the passages. The King James Version has retained its reputation as one of the most popular of the Bible translations, even to this day, in spite of its sometimes awkward and difficult to follow Latinized sentence structure.

The King James Version was first printed in 1611, in large size pulpit format. The first smaller size Bibles, for individualized study, were first printed around 1613. These were all 80 book bibles, containing what we now refer to as the "Apocrypha". This was a monumental undertaking.

In 1769 the spelling of the original 1611 version was first updated, along with minor word and punctuation changes and changes in some of the marginal notes. This was the little known and rarely acknowledged Baskerville-Birmingham revision of the King James Version. This is the spelling and wording contained in the King James Bibles that are sold today. This was also an 80 book bible.

In 1870 the English Revision Committee was appointed and charged with the task of updating the King James Version (actually the Baskerville Birmingham revision) to reflect then current spelling and punctuation standards, and to take into consideration the considerable advances in knowledge of the ancient languages and manuscripts that had occurred over the preceding 250 years. Their New Testament work was completed in 1881, and their Old Testament work in 1885. The resulting Bible is known as the English Revised Version. It omitted the apocrypha and was the first widely distributed Bible to be printed in the now familiar 66 book format, omitting the apocrypha.

To the best of my knowledge there is but one source for an authentic reprint of the original 1611 version of the King James Bible available, that being from Hendrickson Publishers. That reprint also has a very interesting preface discussing the history of these early Bibles and is reasonably priced. The 1611 version of the scriptures is also available in its original Middle English spelling at <http://www.study-light.org>.

The greatest difference between the original 1611 and subsequent revisions of the King James Version is the updating of spelling and punctuation to the developing standards. Many of the footnotes and italics were also changed in the subsequent revisions. For this comparison the text

and punctuation from the 1769 revision of the King James Bible was used. Paragraph markings and italics were taken from the original 1611 version. Explanatory notes from both versions are included within {brackets}.
